

Anaphylaxis Awareness Training Confirmation Sheet

Anaphylaxis is a sudden and severe allergic reaction that can be fatal. An anaphylactic reaction requires immediate emergency medical treatment including a single dose of epinephrine by using an Epinephrine Auto-Injector such as EpiPen.

Saanich Schools requires that all staff who work with students are anaphylaxis aware and know how to use an Epinephrine Auto-Injector. Every year, you are required to review the EpiPen training video, review the District anaphylaxis policies and submit signature confirmation. You must either review the training online or attend a group training session held at each site at the beginning of the school year.

2020/21 Anaphylaxis Awareness Training Review

You can access the anaphylaxis awareness training materials from the SD63 Health & Safety web-page

Go to: www.saanichschools.ca
Go to: Staff/ Health and Safety/ Health and Safety Training/
New Employee Health and Safety Training

I confirm that I have reviewed/ read and understand the following:

- EpiPen Auto-Injector Training Video
- SD63 Policy 6030 Administering Medication to Students
- SD63 Policy 6040 Anaphylaxis in Schools
