### How Animals Eat

**Pamela Hickman**

What would it be like to catch your food with your tongue? A chameleon knows. Do you carry stones in your stomach to help grind up your food? That’s what a crocodile does. Get ready to meet some amazing animals and find out how they eat and drink in this Level 3 first reader.

### Buttercup’s Lovely Day

**Carolyn Beck**

Maxwell Newhouse, folk artist extraordinaire, has created a unique counting book. The premise is simple. He invites children to count with him from ten crunching caribou down to one lonely moose, by finding other northern animals – from seals to wolves to snowy owls – as they turn the pages. But as the animals appear, so does the snow, until it’s a character too, obliterating light and dark, sky and earth.

### Bradley McGogg The Very Fine Frog

**Tim Beiser**

Bradley McGogg makes his home in the bog where there are plenty of yummy bugs for a frog to feed on. Upon finding his pantry bare one day, Bradley decides to meet his neighbours, in the hopes that they will share some of their favourite meals with him. But this “bog frog” soon finds that not all animals eat alike . . . .

### Looking Closely Around the Pond

**Frank Serafini**

Look closely. Look very closely. Is it a leaf? A net? Just turn the page and, lo and behold, it’s a dragonfly’s wing. Children will learn about dragonflies and many other creatures in this interactive book that encourages imagination and instills a respect for the natural environment.
